KESIMPULAN

Sektor finansial Indonesia terkena dampak yang signifikan dari pandemi virus covid-19, pada awal masa Pembatasan Sosial Berskala Besar pasar modal dan instrumen keuangan lainnya memberi respon negatif terkait peraturan tersebut, karena dianggap akan membatasi ruang gerak bisnis di berbagai daerah dan berbagai sektor yang akan berujung ke permasalahan *going concern* perusahaan.

Sentimen negatif investor tercermin pada merosotnya IHSG, namun ditengah banyak nya spekulasi dan sentimen negatif pasar yang berlebih, sektor keuangan syariah menunjukan performa yang tidak biasa, sektor keuangan Syariah di Indonesia menunjukan komitmen yang kuat walau di tengah Pandemi covid-19, hal ini dikarenakan inovasi, CSR, dan prestasi dunia keuangan syariah di Indonesia yang terus meningkat.

AWARDS IN THE MIDDLE OF COVID-19 PANDEMIC

IDX conducted a press conference by announcing that IDX received The Best Islamic Capital Market at the 2020 Global Islamic Finance Awards (GIFA). This is supported by the achievements of the IDX including:

- *Sharia investment innovations including shares waqf, shares zakat, shares alms and sukuk waqf, the Indonesian Islamic Capital Market also has waqf sukuk which is the first waqf sukuk in the world and the Indonesian Sharia Capital Market consistently issues green sukuk and the IDX is a member of the Sustainable Stock Exchanges Initiative .*
- *IDX performed Corporate Social Responsibility (CSR) in the form of a virtual education facility, and has an integrated literacy and inclusion activity platform called Sharia Investment Week (SIW).*
- *IDX is the first Stock Exchange in the world to develop an online transaction system that complies with sharia principles or the Shariah Online Trading System (SOTS).*

CONCLUSION

The Indonesian financial sector was significantly affected by the Covid-19 pandemic, at the beginning of the Large-Scale Social Restrictions period. The capital market and other financial instruments provided a negative response regarding this regulation because it was considered to limit the space for business in various regions and sectors which would lead to going concern issue of the company.

The negative sentiments of investors were reflected in the decline in the IHSG, but, amidst a lot of speculation and excessive negative market sentiments, the Islamic financial sector showed an unusual performance. The Islamic financial sector in Indonesia showed strong commitment even in the midst of the Covid-19 pandemic, this is due to innovation, CSR, and the increasing achievements of the world of Islamic finance in Indonesia.

Sedikit nya dibuktikan oleh performa index syariah di BEI yang *rebound* lebih tinggi dari IHSG dan return sukuk yang bertahan lebih kuat dari obligasi konvensional, ditambah dengan prestasi GIFA yang didapat BEI.

Sektor keuangan syariah di Indonesia menjadi hal yang menarik untuk dijadikan pertimbangan untuk mengalokasikan dana investasi pada masa pandemi sekarang ini.

At least some achievements showed by the performance of the sharia index at the IDX which resulted to higher return than the IHSG and the return of sukuk that was stronger than conventional bonds, coupled with the GIFA achievements obtained by the IDX.

The Islamic financial sector in Indonesia is an interesting matter to consider about allocating investment funds during the current pandemic.
